Nuxeo Video Suite by Genus Technologies

Nuxeo Video Suite by Genus Technologies extends the already comprehensive Nuxeo Digital Asset Management (DAM) solution with a simplified video management module for an enhanced video experience. Nuxeo Video Suite includes several configurable components including an enhanced video player, captions, subtitles, and translation, expanded transcoding, video on demand, and live stream video.

Enhanced Video Player

> The Nuxeo Video Suite enhanced video player includes controls for play, pause, picture-in-picture, full-screen mode, playback speeds and volume for easy and efficient viewing. The video player includes a storyboard (keyframes) for easily browsing the contents of the video, enhancing the user experience.

Captions

> Nuxeo Video Suite provides AI-powered auto-generation of video captions utilizing industry-leading speech-to-text services. The captions are time-aligned, displayed in the player as an overlay on the video, and stored within Nuxeo. Users can turn the captions on or off during playback improving accessibility to video content.

Subtitles

> Nuxeo Video Suite simplifies the creation of subtitles, automatically generating them in the language(s) of choice. Create subtitles in your users' native language or multiple languages allowing videos to reach a larger global, multilingual audience.

Video Streaming

> For customers managing long-form video or supporting heavy concurrent video consumption, Nuxeo Video Suite offers video streaming. Streaming will allow adaptive bit rate (ABR) playback for an optimal viewing experience. It also allows users to scrub through the video or move to a specific spot in the video through keyframe selection with minimal buffering.

Live Streaming

> In conjunction with the streaming module, the enhanced player provides support for streaming of live events. These events could be small group meetings or large corporate communications. You can easily schedule, notify users, broadcast the live event, and record for playback later.
